In a constant determination to radically improve services, KLM is drastically revising its schedules. The result? An increase of nearly 40% in flights in the coming years.

Meaning that there'll always be a KLM flight at just the right time for you. A wider range of new arrival and departure times. Resulting in highly convenient connections at Amsterdam Airport Schiphol which drastically reduce transfer times. Frequently offering the first flight to and from major European centres. And the last flight back.

And always adding new destinations so that KLM now serves 67 destinations throughout Europe. And 150 in its far-flung worldwide network.

Fly KLM through Europe. Or through the world. The excellence remains the same. And so does the determination to meet your ever-increasing expectations.

Test us, try us, fly us.

## Interest rate uncertainty keeps issuers in check

By Tracy Corrigan

FURTHER turmoil in the world's stock markets is dampening activity in the primary market. Volatile market conditions have created considerable uncertainty about the direction of interest rates in many markets, which is likely to keep both issuers and investors inactive for at least the rest of

The obvious instrument for bond investors in such an environment is the floating-rate note, but margins are generally too high for this option to be attractive to issuers. However, Austria's Sch2bn

three-year offering of floating rate notes, part of a regular programme, benefited from the change in market sentiment. The deal - divided into a

Sch1bn domestic tranche and a Sch1bn international tranche was quoted at 99.85 bid,
 from an issue price of 100. Dealers said that volatility in the currency markets is also deterring investors. In particular, investors are likely to steer clear of dollar and sterling

INTERNATIONAL BONDS

the pound came under increasing pressure in the foreign exchange markets yesterday. Among a handful of other. mainly targeted, deals, the European Investment Bank launched an Es10bn five-year

NEW INTERNATIONAL BOND ICCIIEC

deal via Banco Portugues do Atlantico. The deal was largely unaffected by market volatility, as the relatively high coupons available are still attracting retail investors, who expect further gains in the sector through the convergence of European economies. The deal was bid at 100.80, just below its par issue price but well inside

In the equity-linked sector, Casio Computer launched a \$250m four-year offering via Daiwa Europe. The deal traded at 1021/4 bid, a premium to its par issue price. The calendar for Japanese equity-linked offerings is light for the rest of the year, with only half dozen new issues on the cards in the dollar sector.

## Moody's may upgrade News Corp rating

**By Simon London** 

NEWS Corporation. international media group headed by Mr Rupert Murdoch, may have its credit ratings upgraded by Moody's Investors Service, the US credit rating

Moody's said that it has put the credit ratings of the group and its subsidiaries under review for possible upgrade. The ratings were previously under review for possible downgrade.

Moody's said that the change in outlook resulted from measures taken by News Corpora-

tion to strengthen the position of debt holders including a restructuring of outstanding debt, raising new equity and asset sales. Senior debt guaranteed by

News Corporation is currently rated B3. a full five notches below investment grade. The company has \$1.7bn long-term debt securities in issue.

The credit ratings of Danish banks are more stable than their peers in other Scandinavian countries, according to

FT-ACTUARIES SHARE INDICES

1% point fees.

The agency said that the

early deregulation of the Dan-

ish financial system had given

the banks longer to adapt to a

competitive environment than

in many other European coun-

In common with banks else-

where, deteriorating asset

quality and declining earnings

have depressed profitability

However, Moody's said that

the Danish Institutions were

better capitalised than UK

Swedish or US banks, enabling

them to potentially absorb

losses.

Although most of the job cuts were achieved within the Salomon's overseas operations, including London and Tokyo, also came under the knife.

The round of redundancies come just two weeks after Salomon re-shaped its senior management. In early November, Mr Deryck Maughan, the firm's chief operating officer, set up a new nine-man management executive committee to oversee the day-to-day running of Salomon.

The latest job cuts are seen as the latest step in this policy to concentrate Salomon's energies on its highly-profitable bond trading unit, and to marginalise its underperforming investment banking and equity operations.

# Merrill brings triple-A into focus

Tracey Corrigan on the US investment bank's derivatives concept

BRRILL LYNCH
Derivative Products,
the triple-A rated swaps unit set up by the US investment bank to boost its ability to do business with credit-sensitive clients, could point the way for other banks

of declining credit quality. The concept of a triple-A rated derivatives unit, isolated from its parent bank, has intrigued bankers since the mid-1980s, but Merrill is the first firm to realise a workable structure for such a unit. The closest precursor, Credit Suisse Financial Products, is a subsidiary of Crédit Suisse, and depends for its triple-A rating on the backing of the Swiss

other firms are now likely to try to imitate the MLDP structure. Among banks believed to have explored the idea are Citicorp and Salomon

Brothers. In the past few years, some banks have tried to attract the backing of insurance companies, several of which subsequently realised they could get a better return on capital by going into the business on their own - the most notable success story being AIG Financial Products.

MLDP, backed by \$300m of capital from Merrill Lynch and \$50m of preferred stock, will act as an intermediary between AA and AAA-rated clients and Merrill Lynch Capital Services, Merrill's traditional swap dealing entity.

Initially, the unit, which will be up and running in the first week of December, will provide interest rate and currency swaps and interest rate options. But equity derivatives will be offered in a few months time and currency options will also be added to the menu.

"The (swaps) market was always very credit conscious," said Mr Flavio Bartmann, a director of MLDP. Swap count-er-parties became increasingly nervous about credit risk after the demise of Drexel Burnham Lambert, the US junk bond specialist, and a spate of down-grades of US banks in the late 1980s. "Market participants have been paying substantial premiums to deal with the few triple-A rated banks around,"

said Mr Bartmann Mr Bartmann is one of the five-strong swaps team, headed by MLDP's chief executive, Mr Conrad Voldstad, which joined Merrill in 1988. The team realised the power of a triple-A rating, having joined the firm from J. P. Morgan.

uring the following year. Merrill was caught up in a drastic restructuring of its business. as well as having to contend with unfavourable bond market conditions. Although the debt group was "performing well" in these difficult circumstances, according to Mr Bartmann, the group's push to build a distribution network for swap products was "very

Conrad Voldstad: 'Will enhance our position'

handicapped by being a single-A rated investment bank" The derivatives market. favoured by an expanding client base and relatively plump margins, has been a crucial competitive arena for banks during these years, It is also an area where banks can provide a "value added" service which acts as a stepping stone to other business, such as bond underwriting. So for lowerrated banks there is a danger that a competitive disadvantage in the crucial derivatives area could feed through into other areas. "Merrill's swap business is integral to its debt securities. . . business around the world," noted Mr Edson Mitchell chairman of MLDP. Because of its dominance of the US corporate bond market,

Merrill Lynch is still the world's leading underwriter overall, but its position in the Eurobond market has slipped a little in recent years, to 10th place so far this year, accord-

ing to Euromoney. The new subsidiary will significantly enhance our position as a swap counterparty with highly-rated international clients. . . . said Mr Voldstad, allowing Merrill to expand in areas where a Triple-A credit rating is a precondition.

Merrill decided at the end of

1990 that the focus needed to achieve a triple-A rated entity was to isolate credit risk. "The innovation is that the structure separates credit risk and market risk - and involves a minimal amount of credit risk," explained Mr Bart-

However, the structure also requires substantial capital, which could deter other players. Merrill clearly expects the return on capital to justify the initial input: the target for the bank as a whole is a 15 per cent return on capital, and a strong derivative unit is expected to help that target to be

"The biggest failure would be to have simply created a stand alone unit." suggests Mr T.J. Lim, head of non-dollar swaps, since that would defeat the purpose of the operation. "We do not view it as a separate business but as part of our integrated capital markets services," agreed Mr Bartmann.

## Wall Street fall-out brings postponements

FALLING US share prices started to take their toll on new issues in the international equity market yesterday as bankers said that postponements are now inevitable until the current volatility recedes, writes Richard Waters.

The transactions most in danger of stalling appeared to be those being brought in the US market where portions of the issues had been targeted at international investors. A handful of these, which had already been marketed and were expected imminently, appeared the most vulnerable as US share prices fell in early trading in New York, bankers

In one of these, for Burling-

ton Northern, a railway company, Morgan Stanley is offering 1.8m shares in the international market. The international portion of the issue, which also involves Merrill Lynch and Goldman Sachs, was worth around \$65m after

INTERNATIONAL **EQUITY ISSUES** 

the morning session in the US vesterday. It remained unclear after early trading whether the issue would now be postponed. Meanwhile, advisers to the three big privatisations

currently being brought in the

deals would not be shelved as a result of the market vola-

Marketing for the BT issue

began a week ago and continues until early December, and Warburg, the lead adviser, has already begun the process of book-building through which it will establish the eventual price of the institutional portion of the issue. However, firm bids from institutional investors around the world were not expected until towards the end of this pro-

Had Warburg proceeded with a traditional UK fixed-price. underwritten issue, it would today have had to fix

the discount for the shares - a difficult process given market conditions, and one which could have forced the government to accept a hefty dis-

However, the book-building procedure means that the government's receipts from the issue could shrink if share prices fall further in the coming fortnight. The shares closed yesterday at 350p, compared with 380p at the time the issue was announced.

Paribas, responsible for the privatisation of Crédit Local. the French local authority bank, said the 20 per cent of shares in the international portion of the issue had already been heavily oversubscribed.

## Cockle shortage restricts progress at Hazlewood

By Bronwen Maddox

SEVERE SUPPLY problems in cockles and flat fish restricted Hazlewood Foods, the Derbybased food manufacturer, to a 2.6 per cent rise in profits for the half year to September 28. Turnover also rose 2.6 per cent, to £294m (£286.7m), but operating profits managed only a 1.4 per cent increase to £27m (£26.7m) because of higher fro-zen food costs. However, lower

interest charges gave a pre-tax outcome of £23.1m (£22.5m). Sutherlands, the rival bought in July for £34.7m in shares, contributed one month and about £500,000 within the half year, but the increased capital meant that group earnings growth was held to under 1 per cent at 7.56p (7.5p). The interim dividend is 2.2p (2.1p). Mr Peter Barr, executive chairman since the board reshuffle after the Sutherland deal, said the main problem was the scarcity of flat fish, resulting in "unreasonable" high prices, which for some supplies rose by 50 per cent. Dutch cockle beds were also "devastated" by heavy storms and high tides, and the Dutch government has restricted har-

vesting until the beds recover. He added, however, that flat fish margins had now returned to normal levels and the group expected growth in the second

Heavy investment in ready meals, with a new factory at Wrexham costing an estimated £9m and £3m of new equipment in the Netherlands, had cut into cashflow but the effects had not yet been felt. Mr Barr reported that gro-

cery businesses achieved underlying growth of 21 per cent in operating profits, helped by new mineral water bottling capacity, and new products in bakery.

Sutherlands, which makes sandwiches, sausages, pre-prepared meals and quiches, was part of the group's strategy to expand in fresh food, where underlying profits growth of 17 per cent was recorded.

Peter Barr: 'unreasonable' high prices for flat fish

Interest charged fell to 23.9m (£4.1m) because of the £59m sale of the confectionery companies in July 1990. Net debt in September was £107.7m, equal to 72 per cent of shareholders funds, compared to 59 per cent

• COMMENT

The results show that growth prospects remain not just modest but hard to predict. That hardly helps the group's rehabilitation - an acquisitive stock market favourite in the 1980s, it tripped over badly in 1990. The impact of the recent investment programme on profits and cashflow had been well telegraphed and accepted by the market. The cockles problems could not have been;

the Dutch government announced the cockle harvesting restrictions only in September, at the start of the season. The problems of the first half should partly alleviate in the second, and the group seems on course for £57m pre-tax for the full year (£51.2m) and earnings of 18.2p (17.1p). However, given the market's recent lack of enthusiasm for the nonbranded foods sector, the p/e of 10 shows some generosity.

#### **NEWS DIGEST**

#### Casket pays interim on £1m profit

AS A RESULT of the programme of reorganisation and reconstruction in the retained businesses, the disposal or closure of loss-making activities and a reduction in interest charges, Casket increased first half profits from £27,000 to £1,05m.

Earnings per share were 0.86p (losses 0.08p) and share-holders will receive a dividend of 0.15p, the first interim for three years. Turnover on continuing

operations rose from £29.7m to £35.4m. In clothing it was up to £21.4m, against £20.1m, in trading conditions "considerably worse than the first half of last year", but pressure on margins led to reduced operating profit, said Mr Joe Smith, chief execu-

In leisure, the bicycle operations grew substantially in turnover and operating profit, and the group estimated it had 16 per cent of the UK

Blue Box Toys, however, experienced a substantial reduction in results and the 70 per cent shareholding is being sold to the Hong Kong partner which holds the minority

Earlier this month the group acquired Chic Apparel, a maker of childrenswear, for a nominal amount.

#### Govett American net asset value lower

Govett American Endeavour Fund, the fixed-life fund which invests in small companies located in the US, announced lower profits of \$3.81m (£2.15m) for the half year to September

30. The figure last time was Net asset value at end-September amounted to \$1.68 (96p) per share, against \$1.72 a year

Investment and dividend income totalled \$7.13m (\$8.3m). Earnings per share fell to 6.99 cents (7.82 cents) and a gross interim dividend of 6.99 cents (9.18 cents) is declared.

#### Caravan operation pulls down Cosalt

A £1.72m downturn at the trading level on the caravan side hit Cosalt in the year ended September 1, and its pre-tax profit fell from £3.78m to

However, the final dividend is maintained at 6.5p for an unchanged total of 10.75p. Earnings per share fell to 15.05p (22.71p).

Trading in the recession continued to be hard; markets were static and competition was restricting margins,

according to Mr Edward Brian chairman. The caravan division suf-

fered a loss of £93,000, against a profit of £1.63m, mainly because of a severe fall in demand. But strengthening the management was already having a beneficial effect.

The safety and protection side progressed well and lifted profit to £1.52m (£1.09m). The fibres operation made a profit of £1.7m (£1.63m) but workwear fell to £613,000 (£715,000) reflecting reduced demand from rental clients.

Bank borrowings, including the planned investment of £1.72m in the construction of the first phase of the North Shields Central Riverside development, represented 40 per cent of shareholders' funds.

#### **Surrey Group back** in the black

Surrey Group, the USM-quoted bookmaker, announced a pre-tax profit of £117,000 for the six months to September 30 against a £198,000 loss for the comparable half year. Turnover was up from £18.2m to £25.1m as the number of outlets increased from 78

"The company is on the way to achieving the critical mass necessary for economies of scale and an improvement in net margins," directors said. Earnings per share came out at 0.09p, against losses of 0.23p.

#### **Stratton Trust** asset value up

Over the six months to September 30 net asset value of Stratton Investment Trust improved by 10p to 188p per share. A year earlier it had stood at

146p.
Gross revenue for the period eased to £396,000 (£405,000), and after-tax revenue fell to £142,000 (£181,000). Earnings per share were lower at 1.12p. compared with 1.43p.

#### Goldsmiths falls £2.09m into red

The recent decline in the fortunes of the Goldsmiths Group, the jewellery retailer, continued in the six months to September 2 with the recession still being blamed. There was a pre-tax loss of £2.09m, against a profit of £44,000.

Turnover fell from £18.1m to £16.4m with like-for-like sales falling 11 per cent. Mr Jurek Piasecki, chairman, said that the south-east of England was the worst affected area and premier watch brands the worst affected products.

Losses per share stood at 6.38p, against earnings of 0.13p. However, the interim dividend is maintained at 1.5p. Mr Piasecki said there was evidence of an upturn which he hoped would continue through Christmas.

#### **UK COMPANY NEWS**

# A campaigning hawk finds few reasons to be cheerful

Andrew Baxter looks at the machine tool maker FMT, just 'coping' in the face of recession

S BRITAIN's machine tool industry grapples with its second year of recession, the head of one of the country's most advanced producers is trying hard to be

cheerful In his factory on the out-skirts of Brighton, Mr Mike Bright, chairman of FMT Holdings, holds up a front suspen-sion spindle made at a factory near Stratford for export to Ford Motor in North America. The £12.5m Rockwell Automotive machine shop, incorporating 20 of Mr Bright's FMT machining centres in a computerised, integrated system with robots, lathes and machine tools from other pro-ducers, was designed by the Brighton company, one of few UK machine tool builders capa-

For Mr Bright, FMT's as seventh largest machine welcome relief from contemplating the effects of the recession. Orders in FMT's sector of the UK machine tool market from which the company normally derives 70 per cent of its business - have plunged 50 per cent over the past year, above the average 40 per cent for the whole market. In the first half of this year,

ble of the task.

Mr Bright had to reduce the workforce from 440 to 340, shedding workers whose training skills were used to develop younger employees. "It is a

tragedy that employees in the forefront of technology — the trainers of the future — are lost while the government

spends millions on training programmes," he says.

Mr Bright warns he may have to make further redundancies if the trading situation does not improve by the end of the year. FMT's sales could fall to £14m this year from £19.8m

in 1990, Mr Bright suggests.
"We're coping," he says. But
he warns that the recession
has put back FMT's overail development plans by five years, and does not see any real upturn in business until 1993. The company is heading for a loss this year after pre-tax profits of £908,000 in 1990. The future of companies such as FMT is important if the UK is to retain its position

achievement at Rockwell is a tool producer. "Britain needs its Mike Brights and its FMTs," says the head of one of the country's biggest producers. Almost alone among UKowned machine tool makers. FMT is competing head on with the Japanese and Germans in one of the most promising areas of factory automation - flexible machining centres which group machine tools together in computer-controlled "cells".

> Consequently, maintaining FMT's product development programme is vital to remain

competitive for when, perhaps late next year, the depleted UK manufacturing sector gradually resumes buying sophisticated machining centres.

Along with other producers,

FMT wants the government to support capital investment by customers in manufacturing through the restoration of full first year capital allowances or tax and depreciation breaks similar to those enjoyed by Japanese capital goods produc-

Along with other producers, FMT wants the government to support capital investment in manufacturing through the restoration of full first-year capital allowances or tax and depreciation breaks similar to those enjoyed by Japanese producers. The Machine Tool Technolo-

gies Association is also lobbying the Department of Trade and Industry for £1bn of pumppriming grants to industrial customers. Campaign leaders concede it would take a fundamental change in the government's stance towards manufacturing for it to succeed. Even so, last week the MTTA kept up the pressure with a report it has commissioned from the Warwick Business School arguing that the government should provide an institutional, cultural, economic and policy environment

the official encouragement of purchases by industry of high-technology machine tools to create an "industrial impetus" such as Japan has long had. He could be forgiven, though, for expressing some

to encourage increased invest-

ment by manufacturers in

capacity, technology and skills.
Mr Bright, viewed within the

industry as a "hawk" on cam-

paign issues, prefers to

describe himself as a "con-structive lobbyist." He wants

exasperation after the events of the past 18 months. He had joined FMT, then called KTM, in 1981, and with a small group of colleagues developed a product strategy in the mid-80s that focused on sophisticated machining centres. This required the ability to link the latest machine tool hardware with software and, ultimately, computers.

Encouraged, he says, by Mrs Thatcher's "good housekeeping policies" of the early 1980s and by a crucial co-operation agreement signed in 1984 with Siemens, the German electronics

group, Mr Bright concluded that, provided KTM could continue spending £1m a year on research and development, small could be beautiful.

So in 1988 Mr Bright and five

senior managers bought KTM from Vickers, the engineering group, in a £10.6m buy-out.
The deal was deliberately structured to give KTM a balance sheet strong enough to finance its spending on tech-nology, and allowed it to spend £2m on two acquisitions in 1989: Kearns-Richards, a Manchester-based maker of larger machining centres which had gone into receivership, and Gateshead based Noble & Lund, maker of gantry-type

aerospace profilers. FMT's vital product development programme has been maintained, and a new K-R machining centre will be

plano-milling machines and

launched next month. But the recession has slowed some of Mr Bright's plans. The pace of technology transfer from the more sophisticated FMT to its two new sister companies has been checked, and a redevelopment of an old paint factory at the front of FMT's Brighton site, into a research and development centre, has been postponed.

Last year FMT had also identified potential partners in Europe which could help increase its continental sales

and strengthen the company generally. But as 1991 approached, "the Germans took one look at our economy and said decisions should be put on the back burner."

r Bright is particu-larly upset about the fate of a £3.5m order won this summer to supply machine tools for the Linyi Construction Machinery Fac-tory in China's Shandong prov-ince. Having spent months winning the order, FMT has been told by the UK government that there is no money available to support it under its "Aid for Trade" soft loans

programme, and the contract now looks doomed. Mr Bright is at a loss to understand why the government is concentrating such funding on Third World infrastructural developments rather than manufacturing projects such as Linyi. "At a time of a recession, this is reducing our manufacturing base, which the government is still failing to support in anything other than words," he laments. Nevertheless, Mr Bright is

putting a brave face on FMT's fortunes, even if it will be 1994 before it has fully recovered from the recession. "With our technology and our customers confidence. I've no doubt we shall be coming through to the year 2000 strongly."

# Anglian Water advances by 9%

By Michiyo Nakamoto

ANGLIAN geographically the largest of the ten privatised water companies, said it has no intention yet of moderating its price increase next year as it unveiled a 9 per cent rise in interim pre-tax profits, from £84.8m to £91.9m.

The company and South West Water are the only two privatised water companies to resist pressure from Mr Ian Byatt, the industry regulator, to voluntarily abate their price increase next year. Anglian emphasised that it still had some time before a final decision was due in January.

Mr Alan Smith, managing director, blamed the impact of the recession for the company's stance. "Had it not been for the recession I have no already announced our intention to abate the increase in

which £56m went into sewage treatment and disposal. Operating costs, including depreciation charges, rose a substantial 17 per cent to

£159.3m (£136.2m) while interest costs rose by 22 per cent to £10m (£8.2m). Net borrowings were £209.2m (£130.5m). Anglian was privatised with net debt, unlike most other water companies

which inherited a cash surplus

from the government. The company, which has been very conservative about diversifying outside its core water business, indicated a much more positive stance towards diversification than it has taken previously. While its core business would always be given top priority, inevitably other businesses would have to regime gets tougher. Mr Smith

• COMMENT
It is difficult to find fault with

a company that is as true to its word as Anglian Water is. Prof. its delivered at the halfway stage may have been somewhat lower than forecast, but not dramatically so. And in just about all other respects the results were largely as expected. Even operating costs, which looked to be on the higher side of expectations, were actually somewhat lower than forecast. For the full year pre-tax profits are being fore-cast at about £173m while a dividend of 19p would give a yield of 7.2 per cent. Although the risk attraction of Anglian justifies a lower yield than the 7.5 per cent for the sector, it is just as vulnerable to political uncertainties overhanging the shares look fair value for the time being.

### TV-am and TVS plan cuts for final 14 months

By Bronwen Maddox and Guy de Jonquières

TWO OF the ITV stations which recently lost their franchises are to slash costs for the remaining 14 months of their broadcasting lives.

TV-am, the breakfast station, is to take its news service from British Sky Broadcasting from 1, following last month's deal to merge the two companies' sales operations.

TVS Entertainment, which serves the south and south-east of England, will be cutting its regional programmes by two hours a week, 14 per cent, to the minimum 12% hours required.

TV-am said it expected some of its 120 journalists to join Sky News, but that there would be an unspecified number of job losses. At present, TV-am maintains a permanent reporting and production staff to broadcast 31/2 hours of news

TVS would continue making network programmes, such as the Ruth Rendell mysteries, "for as long as the FTV network wants" said Mr Tony Brook, managing director. But

he added: "I expect action will be slowing down a lot after next April"

The group's 800 staff will face a "phased redundancy plan" starting in the new year. Mr Brook said that TVS and Meridian, the winner of the franchise, had discussed which TVS staff Meridian might hire. TVS also wanted to establish whether Meridian wanted to buy any of its property, studios, equipment or programme

The group indicated when it lost the franchise that an orderly liquidation was the most likely future.

The group declined to comment about plans for its most troublesome asset MTM Entertainment, the lossmaking Hollywood studio which has been the cause of the group's financial difficulties. TVS said yesterday said that

its bankers had reaffirmed the group's bank facilities until the end of the franchise. TVS has a US facility of about \$95m (£54m), which was organised by Chemical Bank.

## help lift Readicut to £5.67m

By Michiyo Nakamoto

DESPITE REDUCED turnover, improved profitability in many of its businesses enabled Readicut International, the specialist textile group, to lift profits from £5.31m to £5.67m pre-tax over the six months to September 30.

The group attributed the rise to benefits of a cost reduction programme undertaken since the last financial year and a reduction in interest costs. It was also helped by lower raw material prices. The group suffered the full impact of recession in the UK and US throughout the period while growing economic weakness was also felt in continen-

tal Europe. Turnover fell to £103m (£107.5m) but all but two companies increased productivity,

the group said. Staff levels, which had been reduced by over 10 per cent during the last financial year, were reduced by a further 4.7 per cent. The interest charge fell from £1.36m (£1.67m).

However, while cutting costs, the group was making efforts to ensure that it had the capacity in facilities to manage the change from recession to an upturn. Extra capacity was being put in place in several key divisions. The UK companies, in par-

ticular, were raising profitability so that the proportion of profits obtained from overseas dropped back to its traditional 30 per cent level, after having been up to 44 per cent in the past few years. The interim dividend is maintained at 0.63p on earnings per share of 2.01p (1.84p).

COMMENT

The rise at the interim stage confirmed Readicut's reputation as a solid performer. Although the benefits of lower polymer prices were consider able, most of the improvement came through sheer hard work to reduce costs and keep a tight grip on cash. The company is not looking for an immediate upturn. But timely action to combat the negative effects of the downturn means that when that upturn comes it will be ready for it. Forecast profits of £14m for the full year gives a multiple of 18, which is attractive given future prospects, and the dividend yield of 6.5 per cent is above average.

**Bio-Isolates declines** to £179,000

Bio-Isolates (Holdings), the USM-quoted whey protein isolation company, saw pre-tax profits for the first half of 1991 decline from £240,000 to

Directors pointed out, however, that this was an improvement on the £38,000 achieved in the previous six months. Turnover was £2.27m (£2.04m).

With minority interests contributing £45,000, against payment of £8,000 last time, earnings per share were 1.16p

Pittencrieff attacks AmBrit performance Pittencrieff yesterday attacked the financial performance of AmBrit International, its fellow oil and gas exploration

company for which it is making a £3.61m bid. AmBrit made a profit in 1990 - its first since 1984 but has since reverted to an interim loss. The shares have fallen from 25p in 1988 to 4p before the Pittencrieff offer on November 8; it paid no dividends over the same period.

6p last night. The cash offer of 5%p per share is "an escape from a declining investment," Pittencrieff said in its offer docu-

## Lower costs BAT ahead at £662m despite mortgage indemnity losses

By Andrew Bolger

BAT INDUSTRIES said good results from the group's tobacco businesses and robust performances from other insurance operations had helped offset mortgage indemnity losses at Eagle Star, its UK insurance subsidiary.

Group pre-tax profit rose 11 per cent to £662m in the nine months to September 30, on turnover up 5 per cent at

BAT said all its principal tobacco operations had performed strongly, with trading profit rising by 16 per cent in the third quarter. For the nine month period, trading profit was up 9 per cent to £702m. Group cigarette volumes grew by 4 per cent. With buov-

ant sales of international brands, exports rose 25 per cent and accounted for almost 20 per cent of the total volume. Sir Patrick Sheehy, chairman, said demand continued to grow in Far Eastern markets for both US and UK international brands, and progress in eastern European and other

BAT's financial services businesses showed an overall trading profit of £101m, despite Eagle Star's losses of £284m Farmers - its financial services arm in the US increased trading profits by 13 per cent to £256m. In general business, higher fee income led to good profit growth for the management company. The growth in fees reflected an increase in policies in force

new markets remained encour-

Net premiums written grew by 11 per cent in dollar terms to £3bn and policies in force rose to 13.9m, up 7 per cent.

There were gains in all lines of

In Farmers' life business. universal life policies in force also grew by 7 per cent and this, together with higher investment income and better control of expenses, increased Farmers is to expand its

range of life products. Allied Dunbar, BAT's UK life assurance and unit trust subsidiary, contributed £90m to trading profits, up 6 per cent. Total new business, as measured by new initial commissions, was down 5 per cent. Income Protection Plan

business continued to grow.

but overall life production fell

Sir Patrick said the board remained determined to

Sir Patrick Sheehy: buoyant export demand for tobacco dend increases in excess of the rate of inflation. BAT's earnings per share rose by 27 per cent to 17.7p.

> **COMMENT** Sir Patrick must wonder when he will see the end of Eagle Star's mortgage indemnity debacle. He studiously avoided predicting when the situation would improve, but analysu believe the pain should start to recede by the second half of next year. The tobacco businesses have had a strong third quarter and continue to throw off cash, and the other financial services businesses seem sound. BAT will probably have to use some of that money to again pay an uncovered dividend, and maintain the company's position as a yield stock. The belief that things must improve eventually at Eagle Star also makes the BAT shares something of a recovery play at yesterday's price of

614p, down 18p on the day.

A NO BASHING

uy green where pru-dent and possible. This is becoming the motto of organisations as diverse as the German Post Office and the UK's do-it-your-

self retail chain B&Q.
At IBM UK even the contract office cleaners are vetted for their ability to clean without using chemicals that damage the environment. And as part of its green buying policy the German Post Office has phased out battery-driven calculators in favour of solar-powered models because the batteries contain toxic chemicals.

"Suppliers throughout industry have got letters quizzing them but most are not sure how to respond because they are yet to establish an environment policy of their own," says Edwin Datscheiski of the Environment Council, a charity that promotes good environ-mental practice in business.

Companies that espouse green goals cannot afford to be tainted by their suppliers' environmental transgressions. This is why an increasing number is beginning to include environmental criteria when selecting

suppliers.
"It's an issue we can't afford to ignore," says Peter Thomson, director general of the Institute of Purchasing and Supply. "It tends to be the large companies which have been exposed to these issues in other markets."

Small companies are yet to take the issue seriously. Last year the Cranfield School of Management surveyed 200 small businesses and found that less than 10 per cent had a green supplier policy.

Thomson says this is understandable. "It is a daunting subject to take on as a serious commitment, especially for small companies which are finding it hard merely to tread water at the moment."

The effects of green buying policies are already being felt all along the supply chain. Some companies are finding their products more difficult to sell. But more importantly, opportunities are being created for those who can provide goods and services that are environmentally sound.

The recycling of printer cartridges is an example. Typewriter and some computer printers use print ribbons contained in a disposable plastic case. In the UK an estimated 14m cartridges are discarded every year. Inkwell, a small company in Bristol, saw the potential and invented the machinery to re-ink ribbons. It now runs a re-inking service where customers send spent

Peter Knight describes why buyers are demanding that suppliers show environmental credentials

# Green badge of courage

cartridges through the post and Inkwell returns them a few days later. Suppliers of disposable toner cartridges used in laser printers, such as Hewlett-Packard and Canon, have started a Europe-wide recycling scheme. This has been driven by tough laws in Germany and demands

from customers. The spent cartridges are collected and sent to Canon's toner plant in China where they are broken up and the raw materials recycled. Independent companies are selling refilled cartridges for re-use. Many suppliers view demands for greener products as a threat. Companies such as Rank Xerox and HP resisted the use of recycled papers in

their products until recently. The companies thought the papers would damage their products. But Xerox now sells its own brand of recycled paper for its copiers and HP, after testing a number of different brands of recycled paper, recommends the papers that meet its specifications. Both companies admit that they changed their atti-

tudes in response to pressures

from customers.

These pressures can sometimes cause difficulties in the buyer-seller relationship. This is especially true for those companies which are trying to move away from adversarial relationships and develop long-term partnerships with

their suppliers.

"In supply partnerships both sides make strategic investments. Environmental issues are highly strategic and they can test the relationship," says John Gillett, IBM procurement manager for northern Europe. He is responsible for a budget worth 35bn. IBM, which was known in

the past for its adversarial relationships with its suppliers, is now working towards long-term partnerships. IBM is also developing strong green policies and the environmental performance of its suppliers is one of the key factors which determines whether IBM does business with them.

Gillett says buyers following green guidelines have to adopt a diplomatic and innovative approach to preserve the sometimes delicate relationships with suppliers. The approach can take many forms, depending on the atti-

petitive edge and have used their green credentials to win

One of the biggest problems facing buyers who have to comply with green policies is the lack of information on the environmental credentials of products and the manufacturing processes.

Universally accepted label-ling schemes, which would give a green stamp of approval to products, processes and ser-vices, are yet to emerge. Some countries, such as Germany and Canada, run voluntary environmental labelling schemes, but most countries, as well as the EC, are struggling to produce their own. Until the schemes are perfected, buyers have to do their own checking or trust their suppliers. This can be time consuming and problematic because some suppliers can be economical with the truth.

Take so-called environmentally-friendly papers. Recycled paper is not necessarily friend lier to the environment because much depends on where and how the paper is made. It is often difficult for buyers to make the best decisions based on the information provided by suppliers. Furthermore, there is no legal definition for the term "environmentally friendly", which leads to it being used simply as a marketing tool

This problem applies to most products because manufacturers and suppliers do not know the extent of the impact their products have on the environment. Analysis is costly and industry is yet to fund the research on a broad scale.

Scientists are also beginning to change their views about the impacts of some materials on the environment. Phosphates in detergents, for example, were thought to be a damaging ingredient because they can be harmful to aquatic life. But new research has shown that in some circumstances phosphates could be better than alternative ingredients. "I don't think it matters that

there is growing confusion on many issues. Even the big companies have problems in digesting the information," says John Elkington of the Sustainability consultancy.

# Greate environmental awareness and communicate the issues. Most of IBM's suppliers, says Gillett, have been sympathetic to his environmental requests. A few companies have realised that a sound environmental performance gives them a competitive edge and have used. Greek shippers take the plunge for a cleaner sea that a sound environmental performance gives them a competitive edge and have used.

n a winter stroll along a Greek beach, the detritus swept away by municipal cleaners in the tourist season is all too visible: plastic bottles, pieces of nylon rope, an old mattress, lumps of tar. Even without a tanker disaster, some 330,000 tonnes of oil is discharged into the Mediterranean every year from ships, according to the Hellenic Marine Environment Protection Association (Helmena), a privately funded organisation of Greek shipowners and seafarers.

Much of this spillage is caused by careless bunkering when ships load fuel or when oil, ballast water or sludge from the bilges is flushed out at sea. As for rubbish, a recent Helmepa study of debris collected from beaches near Athens showed that while most came from land-based sources, a sizeable amount of wood, metal and plastic had been tossed overboard from passing ships.

Shipping and tourism are Greece's largest industries: the Greek-owned merchant fleet is

A CONTRACTOR

metre Greek coastline. including more than 2,000 islands, is much the longest of any Mediterranean nation. Helmepa founded almost 10 years ago by a group of Greek shipowners at a "time when Greek shipping was in international disrepute because of a generally poor safety record and

and the 16,000-kilo-

several disastrous pollution incidents," says one of its members. "It was clear something had to be done." Its core activity is running voluntary

training seminars for Greek merchant seamen, from skippers to deckhands, on pollution control, safety at sea and environmental awareness. The programmes are designed to improve compliance

with the International Maritime Organisation's conventions on pollution and safety at sea. The association is increasingly involved in educational and public awareness campaigns aimed at curbing pollution in coastal areas of Greece, backed by the EC MedSpa programme. About one-third of the Greek shipping community actively supports Helmepa. Its members operate about 400 out of 2,000 Greek-flag ships and more than 4.000 Greek officers have attended seminars. "No matter how sophisticated the ship, the training and motivation of your crew is what counts to prevent accidents.

says Captain Basil Constantacopoulos, the asso-

ciation's secretary-general. Tanker fleets in particular are ageing, as most of those now in service date from the 1970s' shipping boom, and the heavy cost of

new buildings deters many Greek owners. As a result, improved training for crews is considered more important than in the past.

The seminars place considerable importance on Marpol, the international convention on pre-venting pollution from ships, whether it is oil, dangerous liquids, sewage or rubbish, and Solas, its equivalent on safety.

Last year the association developed a soft-ware package to help familiarise seafarers with both conventions. It is intended for use with shipboard computers. "One advantage is that officers can check specific regulations before they need to apply them. Another is that it's a tool for continuous learning - they can test themselves as they go along," says Christina Prekeze, one of Helmepa's scientific officers.

Seminars for ratings include sessions on the environmental impact of oil pollution and the Marpol rules on rubbish disposal at sea. Since the Mediterranean is a closed sea, whose waters are renewed only once in 80 years, clean ballast

> are the only discharges permitted, provided the ship is at least 20 kilometres from land. However, since few Greek ports are equipped with facilities to handle ships' rubbish or the oily contents of slop tanks, captains continue to wash out oil tanks while at sea and to instruct

crews to dump rubbish overboard. Helmepa's bero last year was an unnamed Greek rating who took photographs of the oily wake left by his vessel and later reported the captain. "It used to be thought that Greek seafarers had very little respect for the marine environment, but our impression is that it's

association's administrator. As part of its public awareness campaign, Helmepa has mounted a permanent exhibition on the marine environment in Athens' port of Piraeus, which is visited by thousands of

growing very fast," says Vicky Kyriazi, the

schoolchildren every year. In a 16-month project which received funding from MedSpa, schoolchildren collected rubbish from beaches around Athens and on the island of Syros. They discovered that plastic items made up almost 40 per cent of the more than 650 cubic metres of rubbish collected around Athens, and metal and paper 36 per cent.

"The beach clean-ups are a very effective way of getting across the environmental message. especially when we explain that it takes four weeks for a submerged bus ticket, and more than 400 years for a plastic water bottle to

## French-Soviet food-for-oil deal 'not in trouble'

By William Dawkins in Paris

SUCRES ET Denrées, the leading French commodity trader, and Interagra, the food group, yesterday denied mar-ket rumours that their \$405m food-for-oil barter deals with the Soviet Union had hit prob-

However, the pair said that financing had yet to be agreed for what are set to be the first harter deals of their type between France and the Soviet Union, while their bankers and commodity analysts said delays were likely.

The government has offered to guarantee 90 per cent of the first of the two contracts involved through Coface, the export credit guarantee body. The French commercial banks involved, including stateowned Banque Nationale de Paris and Crédit Lyonnais, are now preparing to syndicate FFr1.6bn (\$290m) worth of trade credit for the deal, on those terms. One leading stateowned bank says it is too early to judge whether or not potential syndicate partners will accept these conditions.

barter trade will become increasingly common with the Soviet republics, given their shortage of cash and need for food and raw materials. Under the first deal, agreed last month, Sucden is to supply 300,000 tonnes of sugar as soon as possible, in exchange for 860,000 tonnes of Soviet heat-

Commodity analysts expect

ing oil, worth \$130m over the next 12 months. The sugar has yet to be delivered. The second deal was the subject of a Franco-Soviet government protocol at the end of October and has received enthusiastic support from Mrs Edith Cresson, the prime min-

Sucden says it has only just won agreement on the commercial terms for this the second contract, for which it has yet to begin the process of seeking funding. It provides for the delivery to the Soviet Union of 100,000 tonnes of meat, 100,000 tonnes of sugar, 20,000 tonnes of powdered milk and 7,000 tonnes of baby food by the end of March. Payment will be in the form of 500,000 tonnes of Soviet heating oil, 1m tonnes of crude oil and 1.5m cubic metres of natural gas. worth \$275m. Interagra, the

the meat supplies. Sucden and Interagra both insisted yesterday that they expected the contracts to go ahead as planned. "Nothing has happened to prevent this deal " said a director of Interagra. They were both unworried by last week's clampdown on oil exports announced by Mr Boris Yeltsin, president of the

French food group, is to handle

Russian republic. The deal is unlikely to run into serious trouble, given that it has the political backing of the French and Soviet governments, said Ms Farideh Bromfield, head of research at E.D. & F. Man (Sugar). But it is likely to be delayed by the complexity of dealing with the various suppliers and confusions over where responsibility

## lies in the Soviet Union.

FISHMEAL demand remains steady despite the difficulties of Norway's fish farmers, according Mr Stuart Barlow, director general of the International Association of Fish Meal Manufacturers.

"Norway's problems have had no major impact on fishmeal consumption," he said

Strong Far East demand. especially from China the world's main importer, would help to keep prices firm in

1992, Mr Barlow explained.

## Brazilian exports of orange juice 'to rise'

By Victoria Griffith in Sao

BRAZILIAN exports of frozen concentrated orange juice are expected to rise this year to 800,000 tonnes, up from 788,000 tonnes in 1990. The advance will be fueled by increased domestic orange production and the opening of Japan's import markets, Mr Ademerval García, President of the Brazilian Citrus Association, said at the 11th International Congress of Fruit Juices in Sao Paulo, which finished yester-

state of Sao Paulo, which accounts for 80 per cent of the country's total yield, will rise to 241,000 boxes this year, compared with 239,000 in 1990. The forecast was given by Ms Elizabeth Steger, head of orange forecasts for Sao Paulo state. Brazil accounts for 53 per cent of the world's total processed orange juice production. An increase in tree deaths from disease has been offset by a large number of new fruitbearing trees. Ms Steger said that, barring seriously adverse weather conditions, new plantings would cause Brazilian pro-

Orange production in the

few years. The Brazilian orange juice sector has been elated over the last few weeks by fears of another bad crop in Florida. Reduced US production would boost American demand for Brazilian juice. But the country's main hope is Japan, which is lifting barriers to orange juice imports next year, and could become a major con-

duction to rise over the next

In the long run, however, the Brazilian orange sector may run into difficulties. World orange production will rise at an annual rate of 2.5 per cent over the next decade, predicted another speaker at the conference, Ms Paola Fortucci-Marongiu, head of the citrus section at the Food and Agriculture Organisation. The US is rapidly moving toward self-sufficiency, and Mexico and Argentina are becoming increasingly

# Political tangle hamstrings Impala Platinum

Philip Gawith on a company caught between the old and the new South Africa

OUTH AFRICANS are still coming to terms with still coming to terms with the problem of what to do on Tuesday evenings, now that Dallas, the long running saga of the Ewing family, has come off their TV screens after a run of 12 years. They need not look far. The real life dramas of Impala Platinum would be the envy of any scriptwriter.

The world's second largest platinum producer finds itself caught in the inhospitable political maelstrom between the old and the new South Africa. Since July Impala's operations have been repeatedly disrupted by various inci-dents of labour unrest. Mr Michael McMahon, managing director, has admitted that the company has already lost two weeks of production, or 40,000 troy ounces, given its annual production rate of 1.1m ounces. Some observers believe, however, that production losses are double that figure, and that things could get worse if dis-

ruptions continue. Superficially, Impala has serious labour problems. These, however, merely disguise a political argument about the sovereignty of the Bophuthatswana homeland. The two protagonists are the government of Bophuthatswana, where all Impala's mines are to be found and the powerful National Union of Mineworkers, closely aligned to the African National Congress, the liberation organisation, which is fiercely opposed to the homeland system.

The NUM has signed up 60 per cent of Impala's labour force, and would like to represent them; the Bophuthatswana government won't allow this because NUM is a "foreign" union, not registered in Bophuthatswana.

Clearly the simple solution would be for NUM to register.

This it refuses to do because, it argues, this would be lending recognition to an apartheid structure. The Bophuthatswana government is equally undisposed to backing down. It is proud of its achievements, being the only homeland that is close to financial viability without assistance from the South African treasury. It is no coincidence that its is also the only "independent" homeland not to have expressed a posi-

tive preference for reincorpora-

local union, which represented only 7 per cent of the workers. When, however, the union was unable to sell to workers the 1991 wage settlement it had negotiated. Impala was forced to set up worker representatives committees, where NUM members figure strongly.
One solution, suggests Mr
Michael McMahon, the manag-

ing director, would be for the NUM to register as a foreign union in Bophuthatswana, and for the government to recog-

position will not be allowed to persist," he declares. Impala has also purchased and taken delivery of metal sufficient to make up for what it estimates will be the shortfalls between its production and contractual commitments. The chairman says metal flows through the production pipeline should continue until the end of the year. The amount of metal bought forward is less, says Mr McMahon, than direct production losses because of stock-

At least two week's production has already been lost and observers believe the situation could get worse

ANC, meanwhile, not refuses to recognise this independence, but is linked to figures who were involved in a failed coup attempt against Bophuthatswana's President Mangope in 1988.

Impala's instincts tell it that the problem is a political one. and hence not for them. The haemorrhage being caused to the bottom line, however, demands attention. What can be done? Mr Brian Gilbertson. Impala's chairman, comments: "Our position is that we should act fairly, comply with the law of Bophuthatswana and maintain law and order on the mines. In assorted meetings with the Bophuthatswana government we've encouraged them to find some way to enable NUM to achieve recognition in Bophuthatswana. To NUM we've said we simply cannot negotiate with them on any aspect of our labour in Bophuthatswana because the law prohibits us".

In fact the NUM already has a foot in the door. For the three years prior to July, when the trouble started, Impala had negotiated with BONUME - the

compromise include the fact that workers will probably have a limited tolerance for losing wages, without clearly defined gains in sight, while the Bophuthatswana government cannot be unaware of the tax revenues it is losing.

Mr Gilbertson says he believes progress is being made towards registration by the NUM, and government's recognition of that. If, however, labour disruptions continue, the company will start selectively closing shafts. "Plans have been drawn up to do that" he says. Platinum producers are already under pressure from a low price and low productivity coming on top of this could well make some of Impala's 13 shafts unviable. The Genmin group, of which Impala is a part, has already shown, in relation to its marginal gold mines, that it will not hesitate to close unprofitable operations.

Meanwhile, says Mr Gilbertson, there has been no choice but to step up the level of security on the mines to stop intimidation, violence and damage to property. "An anarchical

tion into South Africa. The nise this. Factors encouraging piles built up earlier in the because of low prices. One mystery is why Impala's difficulties have not driven the price up. Mr Gilbertson finds it "totally incomprehensible. In my view there's a train smash coming down the line". In the annual report he argued that "there is now a distinct possibility that newly mined supplies of metal will be insufflcient to meet demand by 1995. . . Prospects for the ionger term are much more

favourable than implied by the

present market statistics and

investor sentiment". The pas-

sage of time and Impala's cur-

rent difficulties, only

strengthen this view, says Mr Gilbertson. Relevant, if not decisive, to the current problems is the tricky set of relations between Impala, the Bafokeng tribe, which owns the land Impala mines, and President Mangope of Bophuthatswana. Three important facts are interrelated: a long-standing enmity between Mr Mangone and the Balokeng tribe, which actually

tried to secede in 1983; a tense

relationship between Impala

and the Balokeng; and perceived close relations between the ANC and the Balokang. Last year Impala signed crucially important agreements with the Balokeng giving them security of tenure over the

lease areas. The problem is that these agreements were signed with Chief George Molotlegi, who is standing in for his brother Edward who fled the country in 1988 for fear of being detained by Mr Mangope in connection with the coup. Chief George is a Mangope appointee, and Edward does not recognise the appointment, and hence any decisions flowing from it. He is trying to overturn the appointment is

the courts. threefold: firstly, if Chief Edward returns as leader of the Basokena, which must be likely in the new South Africa. Impala can expect some tough questions about the arrangements entered into with Chief George. Second, insofar as impala is currently perceived as being with Mr Mangope and Chief George, and against the Chief Edward-NUM-ANC axis, this will not help it in a new South Africa where the ANC will certainly wield more power than it does at present Third, a perception of being close to Mr Mangope does not improve Impala's credibility in the eyes of a largely Balokeng workforce.

impala disputes such reasoning, saying that both in relation to the leases it signed with the Balokeng and its handling of the current labour troubles it has merely done what the law requires. This is clearly true, but, as the company well realises, if barmony is to return to the workplace, then it will have to deal with the perceptions, not only with the

## Soviet metal flood forecast to continue

By Kenneth Gooding, Mining Correspondent

METAL MARKETS will have to live with the turmoil created by exports from the former Soviet Union until at least 1993 and "surplus metal is likely to

be shipped to the west irrespec-

tive of price"

This warning is given by analyst Mr Neil Buxton in Metal Bulletin's latest Base Metals Monthly newsletter. He points out that in the first six months of this year the flow of aluminium from the Soviets to the west increased by 119 per cent, that of nickel by 63 per cent, and that of lead by 52 per cent. The increase in the inflow to the west of copper was 18 per cent and that of zinc 7.7 per cent.

"In terms of the influence on base metal prices, the change in net east-west trade has in some cases been almost solely responsible for the adverse

to be sold to the west for desperately needed hard currency. Demand in the eastern bloc is unlikely to pick no for at least 18 months, Mr Buxton suggests. In addition, stocks there are likely to be much higher than in the west and reducing them will be a drawnout process.

He says that, in theory, it is possible to put forward a positive longer-term picture for base metals demand in the old eastern Europe by comparing per capita consumption with that in the western economies. "However, in practice it is unlikely that the economic performance of the west in the 1960s, or the more recent rapid growth in the Tiger economies

of Asia will be duplicated." Finance problems and the uncompetitiveness of the eastern bloc will hold back growth while "technological developments such as downsizing. thinner coatings and substitution will mean that growth will be less intensive than in the west in the 1960s" "Base Metals Monthly," £600 c year from Metal Bulletin Research, 16 Lower Marsh, Lon-

don SE1 TRJ.

#### Spice prices 'to remain low'

By Canute James in

THE WORLD market for spices will not recover from its current depression until 1993, and sustained recovery will then depend on the state of the food processing industry in the US and the European Community. according to Mr Fazli Husain, a senior marketing adviser on spices for the International Trade Centre of the UN Committee on Trade and Development.

Speaking before the start of meeting in Kingston. Jamaica of the International Spice Group, Mr Husain said pepper prices were at \$1,200 a tonne, a third less than six years ago. "Sixty per cent of the imports are for the food industry, so the projections for higher prices are based on this industry," he said.

Chicago

#### **MARKET REPORT**

Gold advanced by more than \$2 a troy ounce on the London bullion market, boosted by the sharp fail In US equity markets and the easier dollar. But dealers were not confident that gold had much more potential on the upside after gaining about \$7 in the past three trading days. Heavy resistance was pegged at \$364, with a downside target of \$358 seen by the end of the week. "The market was expecting the Dow to collapse, the Dow collapsed, and not enough people bought gold, one dealer said. On the LME copper was again in retreat. undermined by Wall Street's weakness. also exerted pressure. In contrast. zinc closed sharply up, at its highest level since April, and gaining over \$50 on the kerb on talk that late heavy buying reflected an investment fund covering a short position and moving to the long side. Talk of a forthcoming announcement of a production cut by a German producer, though unconfirmed. also helped. However, LME stocks rose by 7.825 tonnes to a record 158,225 tonnes, Nickel closed sharply down, but off fresh 20-month lows struck earlier. Dealers said support for

## LONDON STOCK EXCHANGE

## Further setback on increased selling By Terry Byland, UK Stock Market Editor

SELLING pressure increased in the UK stock market yesterday as some institutions decided that weakness in sterling could spell even greater problems for investors than the heavy fall on Wall Street, which was renewed early in the new session. The FT-SE Index, already down by 41 points, suffered a further savage fall when New York opened for the new session. sion, but rallied to close 39.8 off on the day.

The implications of the rise in French money rates, masked on Monday by the shakeout in world stock markets, heightened tension ahead of tomor-row's meeting of the Bundesbank council and raised horrifying doubts over the outlook for UK rates.

"The UK government now has no room for manouevre

with domestic base rates." commented a strategist at a leading brokerage firm. Others were less restrained and voiced the underlying fear that "the next move in base rates might be upwards."

Several leading UK securities firms planned to hold strategy meetings after the close of business yesterday. Some firms had encouraged clients to buy stock during Monday's fall and again when the a final reading of 2,463.1, did

market opened yesterday morning, when it was lifted by the recovery of 29.52 on the

Dow Average overnight.
But yesterday's early buyers,
who pushed the Footsie ahead by 14 points at first, soon found the tide of the market turning strongly against them.
Some continued to buy against
the trend. Although heavily on
the downside, London was at first able to stand up fairly well to the rapidly weakening opening on Wall Street.

As the other European markets reacted sharply to an increasing slide in the Dow which was 53 points off in UK trading hours, London began to crumble. At worst, the Footsie was 52.5 down and challenging the 2,450 mark. The rally, which left the Footsle at

FINANCIAL TIMES STOCK INDICES

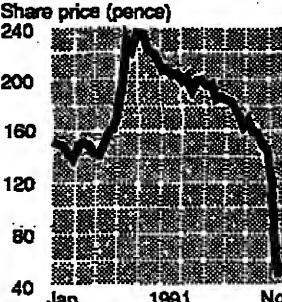

# Heavy of MCC

SHARES in Maxwell Communication Corporation (MCC) fell steeply yesterday after IBCA, a UK-based credit rating group, put the company's debt on credit watch for a possible downgrade. MCC closed 14 weaker at 46p on turnover of

5.6m, heavy for the stock. The shares were also affected by a Serious Fraud Office probe into a company privately held by the Maxwell family. The investigation deals with a £55m loan received by the family interests, underscoring general worries about debt problems at the heavily borrowed Maxwell companies, dealers said.

Mr Derek Terrington of merchant bank Kleinwort Benson said: "The information vacuum is the main problem. If we get some clarification of the debt

Maxwell Communication

the interims announcement, that might its 1992 forecast from £32m to help." The half-time figures are 226m. The broker's building 2% higher at 242%p on heavy healthy turnover of 7.2m

expected around the end of the month. As the chart shows, the sharp rise for the shares following the end of the Gulf war in February proved short-lived, but the drift down became a plunge at the end of October shortly before the death of Mr Robert Maxwell when attention was focused on the

group's serious debt problems.

be taking place yesterday.

#### Bid curtain The final act in BTR's bid for Hawker Siddeley appeared to

Hawker shares eased a penny to 719p as turnover rose to 8.3m on reports that BTR had once again been in the market and raised its 20.3 per cent holding in the company to above 23 per cent. There were strong hints that

substantial stakeholder Mercury Asset Management was about to accept BTR's offer. BTR finished 4 cheaper at 379p on turnover of 3m.

#### BA volatile

Suggestions by the Dutch FNV Union that British Airways (BA) was about to take over KLM, the Dutch flag carrier, helped to shield the shares from the general market weakness. However, the stock reacted quickly when doubts were cast on the market's bopes.

The shares rose 7 to 222p on the talk but retreated to close only a half-penny better at 215%p on turnover of 9.9m after both companies refused to comment and analysts cast doubts on the probability of such a move.

Mr Mark Simpson at UBS Phillips & Drew said: "The idea is not practicable in the short term due to the existing structure of bilateral agreements." He added that increased co-operation between the two airlines was the more likely outcome in the short term.

#### Steetley tumbles

Brickmaker Steetley was among the worst hit in a depressed building materials sector, tumbling 43 to 285p. It was affected by a profits and dividend downgrade from UBS Phillips & Drew, fading bid speculation and a background of uncertainty about interest rates throughout Europe. Turnover picked up signifi-cantly after the UBS downgrade to total 2.7m shares yes-

terday, well above recent UBS said it was holding to its current year profits esti-mate of £30m but had reduced sector team said that come the preliminary figures in March. Steetley would have to look closely at its dividend cover.

UBS predicted a reduction in

#### the dividend from 14p to 9.5p. FT-A All-Share Index Storebouse fell to its lowest level since the mid-1960s as the market reacted to poor October retail sales figures and expecta-tions that the group, which comprises BhS, Mothercare and Habitat, will report an interim loss of up to £17m tomorrow. At the close Storehouse was 3 weaker at 92p, having slipped to 91p at one point. Turnover was an above-Smfth New Court said the shares had fallen badly enough

**Equity Shares Traded** Turnover by volume (million)

said the shares offered "a prospective yield giving a 54 per cent premium to the market and close to an all-time high. This suggests that the worst implications of the Office of Fair Trading proposals are

already in the price."
Several UK stocks traded in the US were hit by yesterday's weak opening on Wall Street. Tightly traded Wellcome led the way with a drop of 29 to 869p as the stock saw continuing correction following the sharp rises surrounding the

results last week. Glazo, one of the most actively traded stocks in the US in recent days, was 41 up in London in the morning, bouncing back from a sharp fall on Monday. However, it took its one from Wall Street and Footsie constituents, closing closed a net 8 lower at 786p on

> the company last week, weakened 13 to 861p. Dunhill retreated 15 to 450p following reduced profits on

Reuters, still suffering fol-

lowing a cautious statement by

Monday, while thinly-traded Rothmans International, owner of 57 per cent of the Dunhill equity and set to announce interim results tomorrow, lost 41 to 1069p. Rothmans was also affected by negative sentiment running over from poor results from BAT Industries yesterday. Analysts' reductions in earnings forecasts for a number of

building materials stocks included Redland and RMC, leaving the latter 19 cheaper at 474p and the former 17 weaker at 515p. Worries about dividend cuts continued to depress BPB.

weak performers in the sector were Costain, 6 down at 66p, and Taylor Woodrow, the same amount off at 153p.

The French decision to raise

interest rates prompted a fall in Arjo Wiggins Appleton, the Franco-British paper group. The shares receded 8 to 257p. Pre-results enthusiasm helped Courtaulds to end the day as one of the few gainers in the Footsie, recording a rise of 4 at 473p on good turnover of 1.4m shares. Analysts are loooking for interim profits to be between £93m and £98m. Hoare Govett, which expects £95.5m, argues that the shares remain undervalued in spite of their sharp rise this year.

Huntingdon International dipped 8 to 215p, reflecting reduced full-year profits.

BAA bucked the market trend, adding 2 at 478p as the shares continued to benefit from Monday's news of the more favourable pricing formula for the company. Dowty Group declined 8 to 172p after Smith New Court

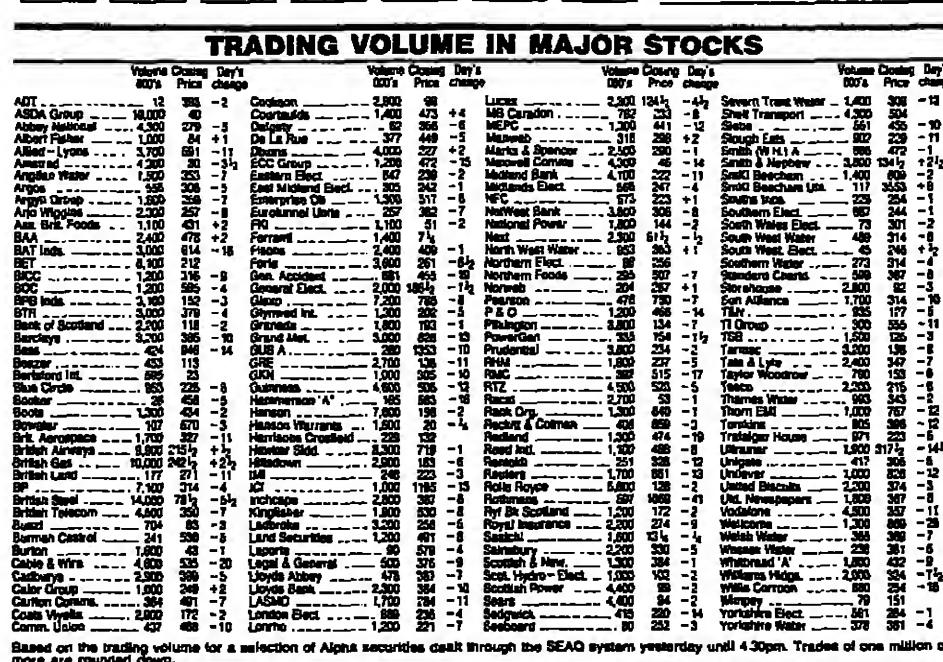

turned seller of the stock. Analyst Mr Chris Avery said: "The recent bid speculation is probably misplaced." MARKET REPORTERS:

### APPOINTMENTS

#### Export experts David Hall, Britain's

commercial counsellor in Washington, is taking over from Christian Adams as the official responsible for helping British industry capture capital projects overseas. The reshuffle comes at a sen-

sitive time in relations between the UK government and the country's exporters. Although there has been considerable criticism of the lack of government financial assistance, professionals in the finance field speak highly of Adams' three and a half year stint as head of the D'Il's projects and export policy department.

The 52-year-old Adams is returning to the Foreign and Commonwealth Office and is rumoured to be in line for an ambassadorship in the Far East, probably in Bangkok.
After Oxford, the 49-year-old Hall started in the Foreign and

Commonwealth Office but later transferred to the Department of Trade. In November 1982 he was promoted to Grade 5 (equivalent to an assistant secretary) in the DTI's overseas trade division. Since January 1988 he has been on loan to the FCO as the commercial counsellor in Washington responsible for supervising the trade and environment policy and trade promotion sections. He has been replaced in

Washington by another DTI man, Anthony Vinall, who has been heavily involved in promoting British interests in the reconstruction of Kuwait.

#### **ASH**

Chris Boon, the Automated Security Holdings director in charge of corporate development, yesterday resigned from the board by mutual agreement", but will continue as a consultant. Boon helped ASH acquire API Alarms in California in

1989 and the alarm business of Group 4 Security and Lander in the UK which helped give the group a critical presence in both markets. But the company is now consolidating recently acquired businesses and sorting out the balance sheet; early this month ASH announced the first part of a programme to sell lease receivables to cut balance sheet debt which has worried the equity markets.

#### Conroy Petroleum

Peter Steen, non-executive director of Irish resources group, CONROY PETROLEUM, has resigned from the board following last week's bid by the company for Atlantic Resources, the Dublin-based oil exploration company. Steen says that he was contacted by the company at 3am in the morning in Canada to inform him formally of the bid, but that he did not agree with the

Atlantic, agreed to subscribe to another 2.04m shares in Conroy as part of the deal. Conroy announced yesterday that O'Reilly had bought 1.7m shares or 3.86 per cent of the company. O'Reilly, who is Ralph Davies is appointed chairman of Heinz Food group in Ireland, Irish Independent Newspapers and the Wedgwood arm of Waterford Glass, has joined the Conroy board. The hid was widely viewed as an attempt by Conroy to head off a hostile takeover by its two main shareholders, Finnish mining company,

strategy. Conroy has not
